

ENTER Curated Choice

May 2023

'Curated choice' is an online commercial group show facilitated by Enter Art Fair. ENTER invites handpicked curators or art personalities to propose a theme under which they will curate a selection of works of any media from the participating ENTER galleries.

Every new edition of 'Curated Choice' will bring a new theme, a new curator and new works – and will run continuously in our newsletter and on our social media platforms throughout the year in between the fairs every August.

All the works are carefully selected by the curator and are all available for sale. You can find prices and detailed information about the works below in the link. Don't hold back. Ask questions and connect directly with the gallery for any inquires.

Curator: Julius Værnes Iversen, designer, artist, curator and florist

Theme #5: Dendrophilia

Plants and flowers are known to soothe, arouse, attract, and affect humans since the day of dawn. Nature and botanicals have always been desired by mankind.

Floristry has traditionally been looked upon as an art form by itself by many cultures and especially by the artistic industries.

Flowers in art can somehow sound banal or ordinary for many but flowers have been interpreted by artists in many creative, uplifting, and extraordinary ways.

By curating a show where the pieces have been either inspired by botanicals, are made by botanicals, or created because of the love for botanicals its possible to showcase the need for floristry in people's everyday life and even exhibit how the material is an important source of inspiration across different creative industries.

About the curator: Julius Værnes Iversen

Julius Værnes Iversen's work spans across different creative industries, where he manages to combine and unite various entities by trying to break down the existing barriers between individual work fields.

Starting as a traditional florist and moving towards becoming a designer and artist, he succeeds in bringing the art form of botanical installation work to life.

This curation lays close to his origin by reflecting on the existence of botanicals and their importance in the art industry. Flowers are beautiful both in their natural form and in the reinterpretations made by creatives.
